

## WolfsBane AS

The images contained in our character avatar packs are in PNG format.

All the avatars are organised in 2 folders depending on their size:

- the 512px folder contains the images with a size of 512 x 512 pixels
- the 1024px folder contains the images with a size of 1024 x 1024 pixels.

Each avatar has 2 versions:

- one where the character is being displayed on a background
- a second one where its just the avatar (without a background)

The images can be used as they are by importing them in your project or they can be modified in an image editing software.
